HAZARD	IMPACTS & ACTIONS
	<p>Potential Impact</p> <ul style="list-style-type: none"> • Damage to buildings, roads and bridges. • Loss of water and electricity. • Isolation from town. <p>Actions</p> <ul style="list-style-type: none"> • Drop, Cover, hold • Quake safe your home
	<p>Potential Impact</p> <ul style="list-style-type: none"> • Inundation of coastal area. • Strain on inland community resources. <p>Actions</p> <ul style="list-style-type: none"> • Know if you live in a tsunami zone. • Have a grab and go bag for people and pets. • If an earthquake is long or strong get gone. • Stay evacuated until Civil Defence gives the all clear and continue to monitor.
	<p>Potential Impact</p> <ul style="list-style-type: none"> • Loss of electricity. • Damage from high winds. • Landslides. • Evacuation of flood zones. <p>Actions</p> <ul style="list-style-type: none"> • Know if you live in a flood zone. • Evacuate if advised or you feel you need to. • Move valuable items up high.
	<p>Potential Impact</p> <ul style="list-style-type: none"> • Damage to buildings and forestry. <p>Actions</p> <ul style="list-style-type: none"> • Evacuate
	<p>Potential Impact</p> <ul style="list-style-type: none"> • Disrupt lifeline utilities such as power, internet, and water. • May block access to roads and properties. <p>Actions</p> <ul style="list-style-type: none"> • Evacuate immediately if a landslide occurs or you notice unstable ground, alert neighbours if safe. • If you cannot evacuate, move to the side of your house away from the landslide and take pets with you.

Our community has people and resources to help us look after each other during an emergency.

COMMUNITY RESOURCES

Community Emergency Hub

In an emergency it is vital that communities come together to support and help each other.

Community Emergency Hubs are places in our area run by our community in an emergency. These are places communities can gather in an emergency, make decisions, share resources, and look after each other.

The Community Emergency Hub project is a partnership between Community, Council, and Hawke's Bay Emergency Management. The Nuhaka Community Emergency Hub is located at the Nuhaka Domain on Domain Road.

To see the full Community Resilience plan visit wairoadc.govt.nz/services/civil-defence-emergency/community-resilience-plans

This brochure is a summary of the full plan. Plan is to ensure measures are in place to help us look after each other before, during, and after an emergency.

LOOKING AFTER OTHERS

During an emergency, check on other people, share information and resources, and look after each other. Assuring personal safety in an emergency is the priority for all members of the community. Assessing risks should be done regularly and no one should do anything which may put themselves or others in danger.

IN AN EMERGENCY YOU WILL NEED:

AN EMERGENCY PLAN

Make a plan for your household, whānau, and pets to get through an emergency

- Where will you meet or evacuate to?
- How will you look after each other?
- What will we do if we have no power, water, or ways to communicate?

EMERGENCY SUPPLIES

Store basic supplies to be prepared, you don't have to have them all in one place, but you might have to find them in a hurry and/or in the dark.

- Nine litres of water per person.
- Non-perishable food.
- First aid kit, gloves, and masks.
- Torch, batteries, and a phone charger.

You can also store emergency cash, photocopies of your ID and important documents, and keep your car half full of fuel.

EMERGENCY GRAB BAG

- Pack your grab bag with basic supplies.
- Your bag should be light enough that you can still carry it.
- Walking shoes, warm clothes, a raincoat, and hat.
- Water and food.
- Medication, masks and hand sanitizer.
- Cash and copies of important documents.

Nuhaka Community Resilience Plan Summary

WHAT WILL WE DO IN AN EMERGENCY?

Supported by

Tsunami Hazard Zone

If an earthquake is

LONG OR STRONG, GET GONE

FEEL a strong earthquake where it's hard to stand up, or a weak rolling earthquake that lasts a minute or more?

SEE a sudden rise or fall in sea level or **HEAR** loud noises from the sea?

MOVE immediately to the nearest high ground, or as far inland as you can!

KEY SURVIVAL FACTS:

1. A tsunami may arrive 15-40 minutes after a major earthquake. The first waves will not be the largest and they may be up to an hour, or more apart.
2. Go immediately to a safe area.
3. Evacuating on foot or by bike might be better than driving. Roads may be damaged by an earthquake and will block very quickly. Take your emergency grab bag.

Plan your route
