

# Wairoa pest control

*Pest control work in Wairoa will be carried out from February 2020.*

*Bait stations containing Pestoff Possum Pellets (Brodifacoum) and Diphacinone (RatAbait) will be placed around the edge of the urban area to control possums.*

*Poison warning notices will be erected around the area. Please do not allow children to wander unsupervised or dogs to roam or scavenge. Feral animals could contain toxic residues and should not be eaten.*

**Unauthorised removal of signs or bait is an offence.**
